

TO THE RESCUE OF BATS!

I am aware that bats:

- are not dangerous if we don't touch them.
- don't drink our blood and do not get caught in our hair.
- can eat 600 insects in an hour!
- are in danger of disappearing.
- can be carriers of rabies, even though this is very rare.

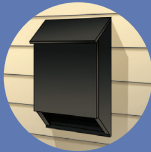

I NEVER touch a bat!

I tell an adult if I find a bat.

**There is no reason to be afraid of bats; they are useful
– and they need our help!**

**At night,
I turn out the lights!**
Bats like the dark.

I am putting up a bat house.
*Bats can sleep there during
the day.*

I do not use pesticides.
*Pesticides are harmful to bats,
birds and pollinators.*

**I share my observations
about bats.**
*Our observations are useful
in learning more about bats.*

I do not cut dead trees.
*They are used as homes
by bats.*

**I tell my family and
friends, so we can all try
to help bats.**

In case of contact with a bat, call Info-Santé (8-1-1 for Quebec)
